RE: Basement Recommendation

We were recently looking to finish a portion of our basement. An add for Basement Living Systems caught our eye and we made the call. From the initial visit to the finished product our experience was a great one. The presentation impressed us; it was easy to see the quality of the wall system, and the cost was right in line. When the actual work began, the crew that worked in our house for four weeks was top notch. The end result exceeded our expectations; we now have a new room in our home that we spend more time in than any other.

We highly recommend Basement Living Systems to anyone considering refinishing a basement or adding livable space to their home.

Sincerely,

Bryan Lloyd
